RESPONSIBILITY STATEMENT

This Product Highlights Sheet has been reviewed and approved by the directors and/or authorised committee and/or persons approved by the Board of Apex Investment Services Berhad and they have collectively and individually accept full responsibility for the accuracy of the information. Having made all reasonable inquiries, they confirm to the best of their knowledge and belief, that there are no false or misleading statements or omissions of other facts which would make any statement in the Product Highlights Sheet false or misleading.

STATEMENT OF DISCLAIMER

The Securities Commission Malaysia has authorised/recognised the issuance of Apex Quantum Fund and a copy of this Product Highlights Sheet has been lodged with the Securities Commission Malaysia.

The authorisation of the Apex Quantum Fund and lodgement of this Product Highlights Sheet, should not be taken to indicate that the Securities Commission of Malaysia recommends the Apex Quantum Fund or assumes responsibility for the correctness of any statement made or opinion or report expressed in this Product Highlights Sheet.

The Securities Commission Malaysia is not liable for any non-disclosure on the part of the Apex Investment Services Berhad responsible for the Apex Quantum Fund and takes no responsibility for the contents of this Product Highlights Sheet. The Securities Commission Malaysia makes no representation on the accuracy or completeness of this Product Highlights Sheet, and expressly disclaims any liability whatsoever arising from, or in reliance upon, the whole or any part of its contents.

This Product Highlights Sheet only highlights the key features and risks of this unlisted capital market product. Investors are advised to request, read and understand the disclosure documents before deciding to invest.

PRODUCT HIGHLIGHTS SHEET

APEX QUANTUM FUND

BRIEF INFORMATION OF THE PRODUCT

1. What is this product about?

This is an open-ended Mixed Asset Growth and Income Fund, issued and managed by Apex Investment Services Berhad.

The Fund seeks to provide investors with capital appreciation and potential income distribution in the long term by investing in a diversified portfolio of investments. The Fund is neither capital guaranteed nor capital protected.

PRODUCT SUITABILITY

2. Who is this product suitable for?

The Fund is suitable for investors who expect capital appreciation with potential income distribution and have medium to high risk tolerance.

KEY PRODUCT FEATURES

3. What am I investing in?

Launch Date	12 April 2010 (re-launch)
Initial Offer Price	RM0.2500 (applicable during the initial offer period of not more than 21 calendar days from the commencement date of the Fund)
Tenure	The Fund is an open-ended fund which means there is no maturity date and may only be terminated in accordance with the terms of the Prospectus and the provisions of the Deed.
Investment Strategy And Asset Allocation	<p>To invest in a diversified portfolio of debentures, equity and equity-related securities. The Fund may invest to a maximum of 100% of its NAV in equity and equity-related securities to maximise the returns of the Fund.</p> <p>During adverse market conditions, the Fund will increase its investment in Trustee Stocks that have consecutive dividend payment records of at least 5 years, fixed income instruments that have RAM or MARC credit ratings of at least Double A, or money market instruments from licensed Financial Institutions. The Fund will not take positions that would be inconsistent with the Fund's principal strategy irrespective of the market conditions.</p> <p>The Fund will hold a minimum investment of 40% of the NAV, in stocks or fixed income instruments or any other form of investment instruments which provide regular payments of dividends or its equivalent and permitted by the Securities Commission. We adopt an active investment management approach that is not a 'frequent-trading' strategy", however the frequency of its trading strategy will very much determine by the prevailing market opportunities.</p>
Benchmark	60% of FBM KLCI and 40% of Maybank Berhad 1-year fixed deposit rate
Minimum Investment	i) Cash Plan – RM1,000.00 for initial and RM100.00 for additional investment.

	ii) Monthly Regular Savings Plan – RM100.00 for initial and additional investment.
Maximum Approved Fund Size	100,000,000 units
Distribution Policy	Distribution is at the discretion of the Manager. If income distributed, it will be automatically re-invested via issuance of additional Units in the Fund.

Note : Please refer to the Master Prospectus for further details of the fund.

4. Who am I investing with?

The Manager	Apex Investment Services Berhad
The Trustee	Maybank Trustees Berhad
Auditor	Crowe Malaysia PLT
Taxation Adviser	Mazars Taxation Services Sdn Bhd
Solicitor	Wei Chien & Partners
Principal Banker	Malayan Banking Berhad

5. What are the possible outcomes of my investment?

By applying fundamental and technical analysis, the Manager aims to deliver reasonable returns in line with the investment objectives. The Fund is expected to produce capital appreciation due to its investment in the equity and equity related securities. The Fund's investment in Trustee stocks and debentures is also expected to provide regular income distribution. As the equity market is affected by many other factors, the net asset value of the Fund will also be affected by the volatility of the markets. Please note that the capital and returns of the Fund are not guaranteed.

KEY RISKS

6. What are the key risks associated with this product?

1. a) General Investment Risks

- **Country Risk** – Investments of the fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the fund in those affected countries. This in turn may cause the net asset value of the fund or prices of units to fall.
- **Manager's Risk** – This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
- **Risk of Non-Compliance** – Non-adherence with laws, rules, regulations, prescribed practices, internal policies and procedures may result in tarnished reputation, limited business opportunities and reduced expansion potential for the management company. Unit holders' investment goals may also be affected if the fund manager does not adhere to the investment mandate. Compliance unit of the management company, which oversees the entire compliance matters of the management company, will mitigate such risk.
- **Loan Financing Risk** – This risk occurs when investors take a loan/financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments. In the event units are used as collateral, an investor may be required to top-up the investors' existing instalment if the prices of units fall below a certain level due to market

conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the loan.

- **Returns Are Not Guaranteed Risk** – There is no guarantee on the investment returns to Unit holders. Unlike fixed deposits which carry a specific rate of return, the fund does not provide a fixed rate of return.
- **Inflation Risk** – This is the risk that investors' investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.
- **Liquidity Risk** – Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the fund holds assets that are illiquid, or are difficult to dispose of, the value of the fund will be negatively affected when it has to sell such assets at unfavorable prices.
- **Future Contract Risk** – A future is similar to an option, except that with futures, investors must exercise their right to purchase the underlying financial instrument or commodity at the settlement date. Hence, the downside risk is basically unlimited because investors are obligated to fulfil their end of the transaction regardless of how market prices move. A futures contract is an agreement to transact at a later date. Because of this, it is important to sell the contract before the settlement date. That way, investors can avoid having a truckload of commodities delivered to their doorstep on the day of the settlement.
- **Credit and Default Risk** – Credit risk relates to the creditworthiness of the issuers of the debt instruments and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. In the case of rated debt instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a debt instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the debt instruments. This could adversely affect the value of the fund.

b) Specific Risks for investing in equities and equity-related securities

- **Market Risk** – Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
- **Particular Stock Risk** – Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
- **Warrant Risk** – Warrants have a limited life, as denoted by the expiry date of each issue. After this date, warrants can no longer be traded or exercised. Hence, the warrants are worthless after their expiry date. It must also be noted that warrants experience time decay (erosion of their time value) throughout their life, and that the rate of this decay accelerates as warrants near expiry.
- **Negative Return Risk** – The Fund will generate a negative return whenever the stock market is bearish. To minimize the negative return, the fund manager will reduce the exposure of equity investment in the Fund.
- **Dividend Payment Risk** – Dividend stocks may declare less-than-expected dividend payment. This may happen due to an favourable business condition. In this regard, the fund manager will dispose the dividend stocks if the dividend payments are no longer deemed attractive.
- **Derivative Risk** – While the Fund does not intend to actively trade in derivatives, the Manager may enter into forward contracts to hedge the Fund's positions. Unit holders should be aware that there is

a risk of higher volatility in the NAV per Unit of the Fund when derivatives or structured products are part of the Fund's investment assets. Any change in the aforesaid factors would either positively or negatively impact the value of the investment.

c) Specific Risks for investing in fixed income securities

- **Interest Rate Risk** – Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the Fund's investment in debt instruments. The reverse may apply when interest rates fall. In order to mitigate interest rate risk, the Manager will need to manage the debt portfolio taking into account the coupon rate and time to maturity of the debt instruments.
- **Credit Risk** – Credit risk relates to the creditworthiness of the issuers of the debt instruments and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. In the case of rated debt instruments, this may lead to a credit rating downgrade.

2. A unit trust consultant (UTC) may represent a company that distributes unit trust fund that uses a nominee system and the rights as a unit holder may be limited if an investor invest in unit trust funds through it. If the company that distributes unit trust fund uses a nominee system, to state if rights as a unit holder will be limited in any way.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not always possible to protect investments against all risks. The various asset classes generally exhibit different levels of risk.

The investments of the Fund carry risk and you are recommended to read the whole Master Prospectus to assess the risk of the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

FEES & CHARGES

7. What are the fees and charges involved?

There are fees and charges involved and you are advised to consider them before contributing to the Fund.

Sales Charge	Nil
Redemption Charge	Nil
Switching Fee	3 free switches per account are allowed in each calendar year. Further switches will be subject to a 1% charge based on proceeds of redemption.
Transfer fee	RM5 per transfer
Annual Management Fee	1.50% p.a. of the NAV (before deducting the management fee and trustee fee)
Trustee Fee	0.05% (before deducting the management fee and trustee fee), subject to a minimum of RM16,000 p.a

The sales charge will be added to the NAV in deriving the total cost to the investors. The computation is based on the NAV per Unit of the Fund that has not been rounded up.

YOU SHOULD NOT MAKE PAYMENT IN CASH TO A UNIT TRUST CONSULTANT OR ISSUE A CHEQUE IN THE NAME OF A UNIT TRUST CONSULTANT

VALUATIONS AND EXITING FROM INVESTMENT

8. How often are valuations available?

The Fund will be valued on every Business Day and the Net Asset Value (NAV) per Unit will be published on the Manager's website at www.apexis.com.my. However, if the investments of the Fund are in foreign markets, the daily price of the Fund for a particular Business Day will not be published on the next day but will instead be published the next following day (i.e. the price will be available two (2) days later). You may also obtain the NAV per unit of the fund from our customer service at 03-20959999 or email at enquiry@apexis.com.my.

9. How can I exit from this investment and what are the risks and costs involved?

You may request to redeem your investment in the Fund at any point in time by completing the Quickform and returning it to the Manager on any Business Day between 9.00 a.m. to 4.00 p.m. Payment will be made to you within 5 Business days from the day the redemption request is received by the Manager and provided that all documentations are completed and verifiable.

Cooling off-period

The cooling-off period is applicable to all first time investors except for corporation/institution, staff of the Manager and persons registered with a body approved by the Securities Commission to deal in unit trusts.

The cooling off right must be exercised within six (6) Business Days commencing from the date of receipt of the application for Units by the Manager. The refund for every Unit held by the investor pursuant to exercising his cooling off right shall be the sum of the NAV per Unit on the day the Units were first purchased and sales charge per Unit originally imposed on the day the Units were purchased.

Switching is strictly prohibited during cooling off period.

FUND PERFORMANCE

Average Total Return

	1 Year	3 Year	5 Year	10 Year
AQF	15.76	3.87	3.34	-0.35
Benchmark	2.80	-0.60	0.89	2.78

Annual Total Return
